

## ASSIGNMENT-4

### DISTANCE DETECTION USING ULTRASONIC SENSOR

Date	30 October 2022
Team ID	PNT2022TMID11082
Name	SOWNDARYA G
Student Roll Number	811519106141
Maximum Marks	2 Marks

Question1 :

Write code and connections in wokwi for ultrasonic sensor. Whenever distance is less than 100 cms send "alert" to ibm cloud and display in device recent events.

```

Data send to the IBM cloud device when the object is far

Event	Value	Format	Last Received
Data	{"distance":141.21,"object":"No"}	json	a few seconds ago
Data	{"distance":141.21,"object":"No"}	json	a few seconds ago
Data	{"distance":141.21,"object":"No"}	json	a few seconds ago
Data	{"distance":141.18,"object":"No"}	json	a few seconds ago
Data	{"distance":141.2,"object":"No"}	json	a few seconds ago

when object is near to the ultrasonic sensor

Data sent to the IBM Cloud Device when the object is near

The screenshot displays the IBM Cloud IoT Platform console. The top navigation bar includes 'Browse', 'Action', 'Device Types', and 'Interfaces'. A sidebar on the left contains icons for various IoT functions. The main content area shows a device named 'DISTANCEDETECT' with a status of 'Disconnected' and a type of 'ULTRASON'. The 'Recent Events' tab is selected, showing a table of events. The table has columns for 'Event', 'Value', 'Format', and 'Last Received'. The events are all 'Data' events with a 'json' format, and the 'Value' column contains JSON objects like '{"distance":79.66,"object":"Near"}'. The 'Last Received' column shows 'a few seconds ago' for each event. The bottom of the console shows 'Items per page 50' and '1-2 of 2 items'.

Event	Value	Format	Last Received
Data	{"distance":79.66,"object":"Near"}	json	a few seconds ago
Data	{"distance":79.64,"object":"Near"}	json	a few seconds ago
Data	{"distance":79.66,"object":"Near"}	json	a few seconds ago
Data	{"distance":79.64,"object":"Near"}	json	a few seconds ago
Data	{"distance":79.66,"object":"Near"}	json	a few seconds ago
